DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3, 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over John R. Vig, Technical Report No. SLCET0TR-88-1 for reasons of record.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the best prior art of record, Vig, taken alone or in combination of other references, does not teach or fairly suggest the specific structure as set forth in the claim

Response to Arguments

Applicant's arguments filed 9/21/05 have been fully considered but they are not persuasive.

Regarding applicant comments directed to the rejection of claims 1, 3, 4 under 35 U.S.C. 103(a) as being unpatentable over Vig, Applicant argues "Vig does not teach or suggest a quartz plate having sides parallel to an X axis and a Z axis which have been rotated within angles of from about -35 to -2 degrees in the clockwise direction about the Y axis that is a thickness direction of the cut of the piezoelectric oscillator". These

arguments are not persuasive because the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the range of rotating angles from -35 to -2 degrees would have been obvious because the structure of a double-rotation piezoelectric oscillator of Vig would have been used such a range of the rotation based on the optimization, on which the applicant failed to respond to the rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
